

SIMULTANEOUS 5-AXIS VERTICAL
MACHINING CENTER

VC

630/5AX • **630/5AX with APC**

DN SOLUTIONS

VC 630/5AX · 630/5AX with APC

The VC 630/5AX machining center provides full 5 axis simultaneous machining capability. It's highly rigid integral rotary/tilt table and high precision built in spindle provide the solution for both high speed and heavy duty machining of complex parts in one setting.

HIGH-RIGIDITY MACHINE STRUCTURE

- The highly rigid structure designed by 3D simulation techniques, and responsive axis feed system provide world class precision machining capability.

BUILT-IN SPINDLE

- The high performance built in spindle ensures optimum machining performance at high speed and heavy duty cutting.

HIGHER MACHINING ACCURACY

- For higher accuracy, we provide the thermal displacement compensation system even during a prolonged period of machining and high-rigidity machine structure.

BASIC STRUCTURE

High rigidity machine structure results in optimum static and dynamic rigidity verified by 3D simulation, resulting in highly stable precision machining.

High-rigidity design and structure

Machine structure is designed by Finite Element Analysis Method (FEM) and the static/dynamic rigidity is further enhanced.

Travel distance (X / Y / Z axis)

650 / 765 / 520 mm

25.6 / 30.1 / 20.5 inch

Static rigidity

The static rigidity structure of the VC630/5AX has been increased by 30% through the FEM analysis.

Dynamic rigidity

FEM analysis was also used to improve the frequency response and vibration damping property by 35% over the previous design.

High-rigidity axis feed system

The axis feed system structure is designed to achieve the combination of high rigidity and responsive feed motion. The base casting is made of heavy duty Meehanite Cast Iron which provides excellent vibration damping characteristics and guarantees highly stable machining conditions. Roller type linear guideways and highly rigid couplings are included to provide both rigidity and sensitive X, Y, Z axis feed. Ballscrew nut cooling reduces heat generation to minimise thermal displacement.

Rapid travers (X / Y / Z axis)

40 / 40 / 36 m/min

1574.8 / 1574.8 / 1417.3 ipm

Linear scale option

All axes are equipped with the linear scale as a optional feature to maintain the highest degree of accuracy over many hours of operation.

High-rigidity roller type guideway

Rigidity and accuracy of feed system are improved with roller type guideway and coupling.

Roller type linear guideway

Thermal error compensation

live data is collected from multiple temperature sensors around the machine are combined with DN Solutions feed system smoothing algorithms to provide real time thermal compensation and provide optimum precision.

Heat displacement of VC630/5AX after compensation

SPINDLE

Built-in motor minimizes vibration and noise generated.

Built-in spindle

The main spindle is optimally designed with 4 row precision ceramic bearing whose features, low centrifugal force and minimum heat generation, are great merits at high speed condition. The high productivity is realized by reduction of the acceleration time to the maximum speed of main spindle.

Max. spindle speed

12000 r/min

20000 r/min option

30000 r/min option

30000 r/min spindle selection for high productivity is available.

(Please consult with DN Solutions in advance for detailed specifications.)

Spindle motor

Spindle motor power output (30min/cont. : 12000 r/min)

FANUC

22 / 18.5 kW 29.5/24.8 Hp

HEIDENHAIN

30 / 24 kW 40.3/32.2 Hp

SIEMENS

30 / 24 kW 40.3/32.2 Hp

Dual contact spindle

Dual contact spindle is adopted to improve spindle life and surface roughness in high-speed cutting process.

Big Plus
(standard)

HSK-A63
option

ROTARY TABLE

Large workpiece capacity allows a variety of parts to be machined in one set up.

Rotary table

Max. workpiece size and weight

Ø730 X 500 mm
 Ø28.7 x 19.7 inch

Max. weight

500 kg 1102.3 lb

Wider machining area

A wide machining area allows access to machine many features of large workpieces.

Stroke

Division		A-axis	C-axis
VC 630/5AX	Travels (deg)	+30 ~ -120	360
	Rapid traverse (r/min)	20	30

Automatic pallet changer (APC) option

The automatic pallet changer allows setting the workpiece even during the machining process to further improve productivity.

Pallet size	500 x 500 mm (19.7 x 19.7 inch)
Max. workpiece swing (D x H)	Ø 730 x 450 mm (Ø28.7 x 17.7 inch)
Table loading capacity	500 kg (1102.3 lb)
APC Change time	30 s

CUTTING PERFORMANCE

The NHP Series realizes excellent machining performance thanks to its improved structure and comprehensive tooling system.

Machining performance

Max. chip throughput

Item	Material		Condition (SM45C, AL6061 same)
	SM45C	AL6061

Intelligent Kinematic Compensation for 5-axis

For high accuracy 5-axis machining, Intelligent Kinematic Compensation function is recommended. This function minimizes error in complex 5-axis machining applications by maintaining tip of the tool in correct position in respect to the workpiece. In order to properly utilize this function, following four optional items are required.

Recommended optional items

Software

FANUC NC: DCP-i (Developed by DN Solutions)

Heidenhain NC: Kinematic opt

Receiver

Recommended Option

Touch probe

Recommended Option

Datum ball

Recommended Option

Automatic Tool Measurement

Recommended Option

Recommended Option

FANUC 31i PLUS

Fanuc 31i Plus maximizes customer productivity and convenience.

15" Touch screen + New OP

DN Solutions Fanuc 31iB/B5 Plus' operation panel enhances operating convenience by incorporating common-design buttons and layout. It features a Qwerty keyboard for fast and easy data input and operation.

iHMI touchscreen

iHMI provides an intuitive interface that uses a touchscreen for quick and easy operation.

Range of applications

Providing various applications related to planning, machining, improvement and utility, for customer convenience.

Fanuc 31i Plus

- 15-inch color display
- Intuitive and user-friendly design

USB and PCMCIA card QWERTY keyboard

- EZ-Guide i standard
- Ergonomic operator panel
- 4MB Memory
- Hot keys
- Enhance AICC BLOCK
- Touch pen provided as standard

EZ WORK

The software developed by DN Solutions's own technology provides numerous functions designed for convenient operation.

EZ work

The EZ work package delivers speed and efficiency. This menu-driven innovation not only helps customers reduce setup times, but also simplifies common tasks and procedures, reducing the potential for errors. EZ work reduces operating time, protects machinery, enhances quality and speeds up maintenance interventions.

Thermal Compensation

A function to maintain high-precision machining quality by analyzing and correcting the amount of thermal displacement of a structure through a temperature sensor

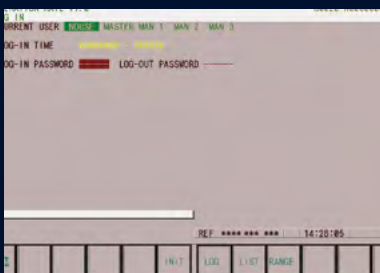

M/G-Code List

Functional description of M code and G code

Tool Management

Function to manage tool information [Tool information / Tool No. / Tool condition (normal, large diameter, worn / damaged, used for the rst time, manual) / Tool name]

Operation Rate

Machine operation history management function by date based on load

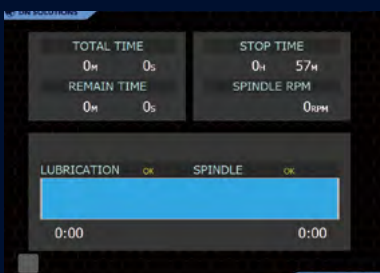

Adaptive Feed Control

Function to control feedrate so that the cutting can be carried out at a constant load

IKC (DCP-I)

The function to compensate the position of the workpiece and the tool tip to be constant regardless of the rotation of the rotating shaft error

Spindle Warm Up

A function that assists spindle warm-up for spindle life when the spindle has not been used for a certain period of time

ATC Recovery

Function to view detailed info with recommended actions and to perform step-by-step operation manually (when an alarm is triggered during an ATC operation)

Addition of Optional Block Skip

In addition to the OPTIONAL BLOCK SKIP of the operation panel, the function to skip a specific block selected in the machining program

CONVENIENT OPERATION

HEIDENHAIN TNC640

Superior hardware specifications

The TNC 640 features optimized motion control, short block processing times and special control strategies. Together with its uniform digital design and its integrated digital drive control (including inverters), it enables you to achieve high machining speeds and the best possible contour accuracy.

- 15" display
- 21GB Storage memory
- 1024 look ahead blocks
- High user convenience with folder structure data management

Conversational convenient function

Data are controlled in the folder structure; convenient communication via USB devices

KinematicOpt & KinematicComp **option**
(Touch probe cycle for automatic measurement)

Collision protection system **option**

Adaptive feed control **option**

Various built-in pattern cycles for a wider scope of application (Software standard)

WHY 5-AXIS MACHINING?

Single setup efficiency

5-axis machining allows you to approach the workpiece from all angles, with complete access to five sides of the part in a single setup. This reduces the overall number of part setups compared to traditional machining, which minimizes machine downtime and maximizes chip making time.

Improved part accuracy

When making parts with multi-sided features using traditional 3-axis machining, multiple part setups are required. This means new inaccuracies can arise each time the workpiece is repositioned. 5-axis machining eliminates stacked tolerances and improves overall part dimensional accuracy.

Extended machine shop capability

DN Solutions 5-axis machines open up new doors for your machine shop. The increased efficiency will make you instantly more competitive, and full 5-axis machining capabilities give you the opportunity to quote on jobs that previously weren't possible. So, what are you going to make today?

“Compared with similar machines from Japan or Europe, DN Solutions has the same level of precision and quality at a better value for money.”

– *OMGM Group, Italy*

“Our DN Solutions 5-axis is making complex, high precision parts for aerospace and defense. Cycle times have been reduced dramatically.”

– *Aerotech Precision Manufacturing, Great Britain*

The DN Solutions promise, MACHINE GREATNESS, has two important meanings. The first is simple: DN Solutions makes great machines. The second is a challenge to our end-users. With a product line that is this comprehensive, accurate and reliable, we equip our customers to machine greatness. The big question: **Why should you choose DN Solutions over other options?**

Here's why...

**MACHINE
GREATNESS™**

WHAT YOU MAKE AND HOW YOU MAKE IT MATTERS—SO MAKE IT
GREAT WITH DN SOLUTIONS.

UNBEATABLE MACHINES

You won't find a more comprehensive range or a better combination of value, performance and reliability anywhere else.

ROBUST PRODUCT LINE

We offer an impressive range of machine models and hundreds of configurations. Whatever your machining needs and requirements, there's a DN Solutions for you.

READILY AVAILABLE - ANYWHERE IN THE WORLD

Machining centres (including 5-axis machines), lathes, multi-tasking turning centres and mill-turn machines, and horizontal borers with best-in-class specifications are all available...ready to install.

EXPERT SERVICE

Our dedicated, experienced and knowledgeable team is totally committed to improving your productivity, growth and success.

RESPONDING TO CUSTOMERS ANYTIME, ANYWHERE

DN Solutions Global Network

DN Solutions provides systems-based professional support services, before and after the machine tool sale, by responding quickly and efficiently to customers. By supplying spare parts, product training, field service and technical support, we provide the expert care, attention and assistance our customers expect from a market leader.
